

New England ITS Technology Showcase

Traffic Signal Technologies

Detect, Track, Classify and Predict: Derq Solution Overview

Jamie Sullivan
VP, Business Development

Join us for a Technology Showcase featuring Derq's AI and machine learning software platform for detecting, tracking, classifying, and predicting the movement of pedestrians, bicyclists, vehicles, and other roadway objects.

This session will highlight real-world transportation applications, including intersection safety, operational efficiency, transit solutions, and automated incident detection.

Monday, August 24, 2026

12:00 – 1:00 PM ET

Virtual Meeting - [Technology Webinar Link](#)
